4.03 Qualifications for Division of Library Services Faculty Appointment

A librarian appointed to the University Faculty must have a master's degree from a graduate school of library and information science accredited by the American Library Association, or an appropriate degree in a subject area related to archival or other specialized work closely related to library and information science.

Appointment to the rank of Instructor shall require the expectation of successful overall performance and the potential for a promising career in librarianship or in the appropriate area of specialization. Appointment to a higher rank shall require the fulfillment of criteria appropriate to the rank according to the approved Criteria for the Promotion of Librarians.

Part-time professional librarians may be considered for appointment as Faculty with rank if they work more than twenty hours per week.
4.04 Terms of Appointment
Appointments to the Division of Library Services are renewed annually in conjunction with a specific position appointment within the University Libraries as specified in the annual contract letter. Appointments other than the initial appointment, which may be made at any time of the year, are for the fiscal year.

5. PROMOTION IN ACADEMIC RANK
The basic criterion for promotion in academic rank is to perform professional level tasks that contribute to the educational and research mission of the university. Promotion from one rank to another recognizes and encourages professional achievement on the part of the librarian as well as to acknowledge significant service to the university and the profession. Evidence of professional competence and growth, as shown in job performance and knowledge base, shall be recognized through evaluation by supervisors and colleagues on the basis of contributions to Librarianship, Scholarship, and Service.

LIBRARIANSHIP
A librarian must be, first and foremost, an effective librarian in the position held. This is the primary consideration in evaluating a librarian’s performance; without it, high rankings in other criteria are insufficient for promotion. Competence in this area rests on a broad grasp of the library’s goals, a thorough understanding of the theories and principles of academic librarianship, and strength in one or more areas of library service such as Archives, Collection Development, Management and Coordination, Public Service, or Technical Service. The candidate should also contribute to the collegiality of the library and University.

1. Archives: formulation and implementation of policies and procedures for archives management following professional standards; coordination of the public presence of the Archives through publications, exhibits, websites, and finding aids; and leadership in exploring new methods of preserving and sharing materials.
2. Collection Development: study and evaluation of library collections; selection and acquisition of books and other materials in coordination with the teaching Faculty; knowledge of the publishing industry.
3. Management and Coordination: administrative responsibility for planning, organizing, implementing, and evaluating activities of a library department or other library unit; personnel supervision and facilities management; budget preparation and control.
4. Public Service: teaching and assistance in the effective use of bibliographic tools including computer systems; performance of manual or computerized reference assistance; formal or informal instruction in research methods and library use.
5. Library Systems: design, implementation, and management of library technologies, including hardware and software systems, and oversight and development of web based library services; coordination of library technology services with Mercer IT Services.
6. Technical Service: classification, cataloging, and other processes, through which bibliographical control is extended over one or more areas of the library’s collections.
SCHOLARSHIP
Librarians engage in research in an academic subject, archival studies, or librarianship and also participate in scholarly, library, and/or professional associations sharing professional expertise in service to the community at large.

An advanced degree or additional course work can be applied toward the scholarship criteria. While the MLS/MLIS is recognized as the terminal professional degree, an additional degree in any discipline promotes the intellectual and professional development of the librarian.

SERVICE
Librarians participate in some combination of the following organizations: Division of Library Services, University Libraries, the University, the community, and religious bodies. Librarians also participate in other activities that contribute to the quality of the academic life of Mercer University.

5.01 Criteria for the Promotion of Librarians

Librarians appointed to the Division of Library Services Faculty are promoted according to standards evaluating contributions to the University, Library, and academic community. Promotion in rank is based on merit and is not made automatically when minimum requirements are satisfied. An evaluation of the individual’s total contributions and qualifications is the determining factor, provided that minimum degree and experience requirements are met.

Initial Faculty rank and any credit towards service in rank is awarded during the hiring process on the basis of qualifications and experience.
